"Hatred is a Danger to Everyone - So Fighting It Must Be The Job For Everyone."

That includes everyone involved in the documentation of these concerns - without delay - without excuses - no exceptions!

Dear Ms Deserry M. Salgado at Sac Health,

The writing here is primarily directed upon you in first person writing.

Consent of Privacy Related To These matters:

This matter until it resolves is into a viable pathway of change is fully public up until otherwise cited.

There is no reason to delete or more drastic block my communications thank you much.

As showing in your signature line,

Sac Health, an extension of the Loma Linda University Education / Health System here in the Inland Empire (next to city of San Bernardino and within the County of San Bernardino.

Our Mission: To reflect the healing ministry & love of Jesus Christ through healthcare, education, and partnerships that empower our communities to flourish.

Educate? Partnerships? empower (or engage) our communities to flourish? Really?

In response,

First, this is not a bashing your efforts nor what has been established so far in your work product.

It might be considered an effect of a broken system as a whole that needs to change. Please receive this correspondence in that view.

Your very last responding email to me was disconcerting in this overall current in process view. Something about deletions.

I think what has been observed and experienced personally by me (as well as documented in a web space of quite uniqueness namespace) is a matter of more generally widespread knowledge in introspection of the matters of truth that everyone seems to attempt to cover over rather than being upward and bring forward.

As a matter of being a victim of a crime (on mylawquestions.com - Fact Checked) under the broad scope term as a variant form of stalking, you as a mandatory reporter contacted the San Bernardino County department of adult aging / adult protective services and Lisa Hernandez was assigned to my case.

This in view of what was my mother' one day statement of threat she was going to kill me. That was also coupled with a statement that her relationship to God was none of my business.

As the MyLawQuestions article implies, there may indeed be a family involvement as a tactic (designed) of this subclass of stalking to psychologically harass victims.

Direct Quotes here (See Link Below):

Begin sentence:

"Stalkers generally design the covert methods used for **psychological harassment** to exact revenge, coerce silence, or cast out persons having opposing views. While gang stalking is considered a misdemeanor in some states, the offense carries **felony** penalties in others.

Leaders generally enlist the aid of other individuals in the gang by various methods, which typically include providing false information about the victim, manipulating potential members, or employing those with similar criminal backgrounds.

Gang stalking frequently uses practices meant to destroy the victim's qualities. These acts might include blaming the target for a gang member's mistakes or taking credit for what the victim accomplished. In an effort to discredit a person or to add to the weaponry for the attack gang stalkers may perpetuate the notion that the target is mentally impaired or dangerous in some manner, forcing the person to undergo evaluation.

The list of physical tactics used against victims generally includes **stalking behavior** and unwanted attention. The majority of persons under attack report that stalkers frequently mirror the victim's behavior. Gang stalking might include mirroring physical gestures or verbal comments. Many victims relay that gang members often enter or leave properties and other locations at the same time as the target. Victims also frequently report that stalkers often repeat private conversations occurring in a home environment or over the phone.

(Individually, I have my own individualized case of observed, experienced, and documented list of specific tactics used against me - for sure!)

Gang stalking targets might also experience hang-up calls or calls from wrong phone numbers throughout the day. (I do) Attackers may enter homes illegally or employ the assistance of the target's friends or family. (Not sure, but probable) In an attempt to confuse the victim or to cause them to doubt their own logic and reasoning, stalkers might rearrange or steal personal items in the work place or home. The criminal offenses of stalkers may become more aggressive or violent against the target, family members or pets.

<https://www.mylawquestions.com/what-is-gang-stalking.htm>

In as far as this statement applies to me, from the MyLawQuestions Definition Article:

Victims may be from any gender or socioeconomic background. These persons may outperform other co-workers, or have a set of standards that separates them from other people in an environment.

As a victim of these tactics, out perform others, to the association of an issued by Grammarly last July?

This is why support@Grammarly.com is being used in these addresses in my email.

This score confirms the definition to a cause and effect and there is absolutely no doubt - this is a matter of pure outright Jealousy on the part of my family held against me.

(Image attached)

Productivity (New Record)

You were more productive than 99% of all Grammarly users.

World wide, really?

In this as a statement of Truth, this matter can not just be ignored. I have attempted to get the cooperative assistance of family for an intense period in these matters without any viable true truth interface of help.

Even my very own cousin,

[@Debbie Kick](#) (contact here is simplified) is (or is a former or perhaps will be a former) Nurse Practitioner as a staff member of Kaiser Permanente in Riverside.

This is what I was told as family knowledge. I have to actually run a background check report on this truth.

Ms. Salgado,

Your last message received is quoted here.

Hello Mr. Driskill,

Due to confidentiality, I have removed the emails of which I have not had contact with or prior authorization to discuss services provided to you. It is my understanding that Kaiser Permanente offers case management services which include social services.

I have attached the form that your primary provider must complete once you have established care and more information on the case management services available. I will connect with Elizabeth and Lisa to follow up on any additional resources for permanent housing that may be available to you.

Kind Regards,

Deserry Salgado, MSW

Our Mission: To reflect the healing ministry & love of Jesus Christ through healthcare, education,

and partnerships that empower our communities to flourish.

Partnerships do not detach community engagement, they maintain and nurture them into resolve. Disability Inclusion? As serious as a heart attack, give me a fucking break.

<https://www.cdc.gov/ncbddd/disabilityandhealth/disability-inclusion.html>

What is Disability Inclusion?

Including people with disabilities in everyday activities and encouraging them to have roles similar to their peers who do not have a disability is disability inclusion. This involves more than simply encouraging people; it requires making sure that adequate policies and practices are in effect in a community or organization.

Inclusion should lead to increased participation in socially expected life roles and activities—such as being a student, worker, friend, community member, patient, spouse, partner, or parent.

Socially expected activities may also include engaging in social activities, using public resources such as transportation and libraries, moving about within communities, receiving adequate health care, having relationships, and enjoying other day-to-day activities.

Disability Inclusion and the Health of People with Disabilities

Disability inclusion allows for people with disabilities to take advantage of the benefits of the same health promotion and prevention activities experienced by people who do not have a disability. Examples of these activities include:

Education and counselling programs that promote physical activity, improve nutrition or reduce the use of tobacco, alcohol or drugs; and
Blood pressure and cholesterol assessment during annual health exams, and screening for illnesses such as cancer, diabetes, and heart disease.
Including people with disabilities in these activities begins with identifying and eliminating barriers to their participation.

Considering the consequences and the seriousness of what has already happened, anyone that has a complaint about the internet domain name terminology used should be corrected - by remaining most professional as this standard applies. ..

"about standards":

On the largest popular and most recognized social media networking site for working professionals of "Linkedin", actual "in operation" company name profiles] contain the word "fuck" in them.

This to be a part of their actual "operating" business license, not just a dba.

Such examples include [but not limited to], "Fuck Cancer" at [<https://www.linkedin.com/company/fuck-cancer/about/>], "Fuck Yeah Astrophysics" at: [<https://www.linkedin.com/company/fuck-yeah-astrophysics-/about/>], "Fuck Rasism" at: [<https://www.linkedin.com/company/fuck-rasism/about/>],and "Fucked Up Design" at [<https://www.linkedin.com/company/fucked-up-design/about/>].

Furthermore, each of these cited examples of companies above each having similarly existing web presence internet domains accessible matching their namesake, [of course]. Such as "<http://FuckCancer.org>" and "<http://FuckYeahAstrophysics.com>", a non-profit example, and a .com example.

The use of my internet domains are valid and professionally applied with disability inclusion adapted, there should be no complaint or mistaken reason to just ignore my web presence and links or to ignore my outgoing email outright.

Please follow all civil society / information society links provided in this email)

As "Fucked Up Design" applies to an object as an apparel company, object ("design") changed to object ("human") follows that applied standard on LinkedIn and across the web as a whole.

Words To Live By

In video form - redirect to a YouTube Video Multi-video Playlist:¹

<Http://community.gruwup.net/20>

Art thou dejected?
Is thy mind o'ercast?
To chase thy gloom,
Go fix some weighty truth;
Chain down some passion: do some good;
Teach ignorance to see or grief to smile;
Correct thy friend;
befriend thy greatest foe;
Be just in all things;
make amends for follies past,
and,
with warm heart,
Forgive, and be forgiven.
Let work not words
Thy virtue prove.
Go act as well as prate,
And then thy counsels will be strong,
Thy reprimands avail. -Anon

THE province of the historian is to gather the threads of the past ere they elude forever his grasp and weave them into a harmonious web to which the art preservative may give

immortality. Therefore he who would rescue from fast gathering oblivion the deeds of a community and send them on to futurity in an imperishable record should deliver a plain unvarnished tale.

When will it be that someone gets out of their fear factors and unite a cause of peace with me?

Very disturbing and concerting in this response I received.

I am not attempting to get anyone into any kind of trouble.

Only to clarify that detachment from these matters of concern might indeed remain as a barrier to care and cause my human death (seriously) if not properly addressed and moved upward into a proper and professional view for downward (higher plane perspective) oversight, accountability, scrutiny and a viable access of an adequate healthcare system to address these matters as a whole, documented on the National Institutes of Health in three (3) researched published findings on the variant form of stalking specifically given a cultural label known label as gangstalking.

The Phenomenology of Group Stalking ('Gang-Stalking'): A Content Analysis of Subjective Experiences

Lorraine Sheridan,^{1,*} David V. James,² and Jayden Roth¹

Author information Article notes

(WE COLLECTIVELY HAVE TO DEAL WITH THESE TRUTHS - NO EXCUSES - NO EXCEPTIONS - AN INCONVENIENT TRUTH)

3. Results

3.1. Length of Stalking

None of the writers of the narratives described their experiences as having ended. All 50 authors stated or implied that they had been gang stalked for lengthy periods of time (e.g., one mentioned being seen by seven psychologists during the period of being targeted, another described having been targeted whilst living in three different countries). The shortest case was described as having begun "in the last few months" and the longest as continuing for "more than 22 years".

Linguistic Analysis of Online Communication About a Novel Persecutory Belief System (Gangstalking): Mixed Methods Study

Monitoring Editor: Rita Kukafka

Reviewed by Jun Wen Tan

Andrew Lustig, MD, MSc, corresponding author#1,2 Gavin Brookes, PhD,#3 and Daniel Hunt, PhD#4.

Conclusions

The study found that contributors to the study corpus accomplished a number of tasks. They used linguistic practices to co-construct an internally coherent and systematized persecutory belief system. They advanced a position that gangstalking is real and contested the medicalizing discourse that gangstalking is a form of mental disorder. They supported one another by sharing similar experiences and providing encouragement and advice. Finally, they commiserated over the challenges of proving the existence of gangstalking.

Note: The matching word "Clinic" (9 times) to include the exact word "clinicians" is mentioned.

The 9 quotes are in the following full expressed cited sentences:

"When targeted individuals present to clinical attention, they are frequently diagnosed with psychotic illnesses and the gangstalking is conceptualized as a persecutory delusional system by psychiatric professionals.

Targeted individuals congregate in online fora where they can speak openly of their concerns, flesh out their ideas, and comment on each other's experiences. These fora are a nonclinical environment where those affected may express their beliefs more openly and transparently without the fear of

being disbelieved or labeled as may be the case in clinical settings.

These results have the potential to inform clinicians interacting with patients who experience persecutory belief systems. Building a therapeutic relationship to enable engagement is the central process in therapy for psychosis [40].

Cognitive behavioral approaches to the treatment of persecutory belief systems recommend that clinicians partner with patients to critically evaluate and dispute delusional and other unhelpful beliefs. Doing so requires a detailed understanding of the beliefs and evidence for and against them. Our hope is that this study may be helpful in that regard.

Our study focused on a particular persecutory belief system. However, insights from this work may be applied more broadly to other, related belief systems. This analysis is particularly valuable because it is based on discussions taking place in a nonclinical setting which arguably allows for more candid and authentic communication, alleviating a potential “Hawthorne effect” of data collected in clinical settings.

Online

fora such as the one examined here represent popular avenues for health-related support and advice seeking. This is likely the case, to an extent, for all health-related issues. Yet, this is particularly relevant to contested health issues such as gangstalking, whose contested clinical status may result in those affected turning to peers rather than practitioners for advice and social support."

This answers the discussion point in my first primary care session with Doctor Chen in the layered need to delay referral for mental health until the Priorities of HIV health interface has been fully established.

This document by Doctor Andrew Lustig is critical to receive and process in view of these entire circumstances onto my healthcare.

One more research paper by Doctor Andrew Lustig in view,

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8569537/>

JMIR Ment Health. 2021 Oct; 8(10): e30311. Published online 2021 Oct 21. doi: 10.2196/30311
PMCID: PMC8569537 PMID: 34673523

Social Semiotics of Gangstalking Evidence Videos on YouTube: Multimodal Discourse Analysis of a Novel Persecutory Belief System

Monitoring Editor: Gunther Eysenbach

Reviewed by Shahzad Ashraf

Andrew Lustig, MD, MSc, corresponding author #1 Gavin Brookes, PhD, #2 and Daniel Hunt, PhD #3

Conclusions

"These data provide insight into a novel persecutory belief system. Interpersonal concerns are important for people affected, and they construe others as either sympathetic or hostile. They create positive ambient affiliation with viewers. We found that vloggers use multimodal deixis to illustrate the salience of the belief system. The videos highlighted the Derridean concept of différance, wherein the meaning of polysemous signifiers is deferred without definitive resolution. This may be important in communicating with people and patients with persecutory belief systems. Clinicians may consider stepping away from the traditional true/false dichotomy endorsed by psychiatric classification systems and focus on the ambiguity in semiotic systems generally and in persecutory belief systems specifically."

In my very own life, I attribute the date I first noticed this cause unknown effect onto my life, as a maladjusted cultural affect condition in my life among my peers was when I wrote a poem in full on Feb

2005 that contains the phrase "Fucked Up Humans" and subsequently the addition of Definitions at the Urbandictionary center point connected with the entry "Humans" on the turnover date of May 1st (SOS / Mayday) and the internet domains to include <http://fuckeduphuman.net> in June of 2005 that is indeed a part of my online journal space that is inclusive of being timestamp registered (with the permission of my father with a discussion) of the center point Internet domain of

<Http://gruwup.net> in July of 2006.

Exactly when will someone confirm what is truthful here?

Humans

There are two adversary forms of humans which are the Fucked Up Human and the Real Up Human. To scale from one or the other, all humans fall somewhere in line by every action that a human makes -- even each and every last keystroke being done.

Well be real up ya all humans... ok?

by In the Mindway May 2, 2005

in 2006, The discussion with my father of internet domain holdings as intellectual properties I hold was indeed a matter of discussion with my father, George Garfield Driskill who gave me the permission to use the family house address of 3260 Grande Vista San Bernardino, the place and home of family since i was age 5, where I grew up.

Gruwup is pronounced even by spoken voice to text interpretations as grew up.

Seriously something has gone violently wrong in that home against me.

All of my writings on the subjects did not contain the word "Gang Stalking" until late year 2019, well after my HIV doctor who worked for Borrego Health terminated my care for attempting to discuss these concerns.

This is unquestionably proving grounds that I am not copy cat mirroring the postings of other targeted individuals.

On family involvements, I fathom only a severely deranged and psychopathic very selfish mother would have engaged into the course documented after the death of my father in July of 2013. Indeed very unmotherly. And for my two cousins Talbot, very detached to disoriented hidden view agendas would be a deductive reasoning why no one has truly stepped in to help stop the catastrophic failings in my HIV care and breakage in civil society .

Everyone involved in such a lineage of disordered affairs would have to have an IQ of 80 to be excused from involvement to the lack of cause pe concern to completely remain silent in these matters, no matter who is being expressed of these truths.

Message body: My result very much confirming a complete catastrophic treatment in HIV has occurred. Your system gives a 10% normalcy grace of results received.

CD4/CD8 RATIO

Your value

0.53

Standard range

≥ 0.90

But WebMD places this at 1.0

<https://www.webmd.com/hiv-aids/what-to-know-about-cd4-cd8-ratio-test>

like an IQ quotient test - similar mathematic scaling 100 = Average.

My recent lowest level of the CD4/CD8 tested in Los Angeles at Wesley Health Centers in January was 0.25, 75 points down from normal 1.0 on my way to dead.

Once again attaching the so far ignored (not confirmed received / read PDF involved in correcting this irreparable harm that has been intentionally placed in a barrier to care to blackball me from my ability to bring these matters forward.

I will be screen capturing my Instagram DM interface to @KpSocial - in view of what is said there that begins with this tweet.

<https://twitter.com/Gruwup/status/1669464202036256768?s=19>

Will someone respond quickly to help me

Jun 15, 2023 at 01:45:00 PM

Message body: As of this moment, I have 'case management' or case manager on my available contacts in messaging on kp patient portal.

I am redirecting an issue that I must (prerequisite) a mandate) of an issue I must bring forward into the full and comprehensive view of my new (revisited) healthcare plan with Kaiser Permanente.

I was with KP when I was first diagnosed with HIV in September of 1999.

As I concluded with my last message on this portal to my primary care doctor,

'I am not smiling at all. I am the most upset I have ever been in my life. As commented in PDF, this has destroyed my family relations (as intentional harm).'

PDF of related email attached.

I have an appointment setup next Wednesday June 21st with Infections Diseases and I must insist that these matters become a part of the awareness of my case with all doctors and the need to assign (due diligence) in correcting a matter that can not be simply blurred, buried under the rug, ignored, or continued in silence.
